The Mound to Hanover Street

Issues you told us about:

- Cycle lane at the bottom of the mound is broken by bus stops
- Traffic drive over the cycle lanes at the Princess St junction
- Parking and delivery vehicles exacerbates congestion and block cycleways
- Street clutter on the pavements adds to congestion
- Traffic light sequences are not well coordinated between pedestrians and road users
- Very vehicle-dominated which is noisy and polluting

New junction proposals as part of George Street Project

New single-stage crossing for pedestrians

Loading opportunities on-street

Upgraded pedestrian and cyclist crossing

3m two-way segregated cycleway

3m two-way segregated cycleway

Crossing design to be developed further in next stage

Bus stop

Location Plan
